Forest4Youth

INTRODUCTION

This Branding Kit is a simplified **digest** of the core communication and **visual identity** guidelines that the Forest4Youth project adheres to. It is designed specifically for recipients—such as media professionals, partner staff, and third-party stakeholders—who do not require full access to the comprehensive Communication and Dissemination Strategy (CDS) but still need to represent the project consistently and effectively.

This document is enacted and justified by Chapter 5 of the CDS, which outlines the project's visual identity framework, and corresponds to **Deliverable D1.1.6** under Work Package 1: Identification and assessment of therapeutic practices – Co-design of a Forest-based Care Protocol. It ensures that all visual and communication outputs remain coherent, while making these standards easily accessible and user-friendly.

PROJECT LOGO

The project logo is composed of the Interreg North-West Europe programme logo, as described in the **Programme Brand Book 2021-2027**, and the project name. Projects use their name written in Montserrat Bold in the colour of the Programme priority they address

The basic unit (u) used for the definition of the brand composition equals half the height of the EU emblem (flag). This measure is used to define the space between the elements as well as the **clear space** around the brand, within which no other graphic elements or logos may be placed.

1.1

LOGO SIZE

52,5 mm
smallest logo width

It is essential to respect the minimum logo size. The appearance of a logo varies greatly according to the medium it is used on. Therefore, minimum sizes for print, screen and video are specified. The smallest logo width of 52,5mm refers to the **width of the Interreg logotype and the EU emblem** - excluding the statement "co-funded by the European Union" and the margins. The brand should not be used in any size smaller than the smallest size specified here.

Media		Smallest logo width
Print A4 portrait	210*297 mm	52,5 mm
Print A4 landscape	297*210 mm	52,5 mm
Print A5 portrait	148*210 mm	52,5 mm
Print A5 landscape	210*148 mm	52,5 mm
Print Business card	85*55 mm	26,25 mm
Print Sign (Plaque) portrait	Any large format (A2+)	52,5 mm

1.1 LOGO USE

COLOURED BACKGROUND PHOTO

BLACK/WHITE BACKGROUND PHOTO

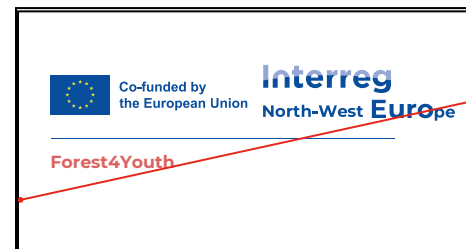

UNAUTHORISED VERSIONS

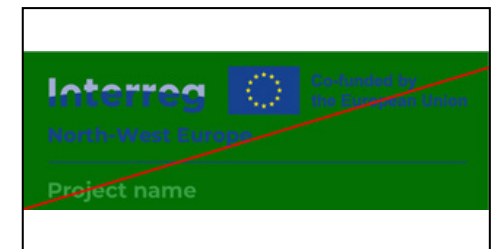

If any doubts or immediate needs surge, contact the project's communication officer to better handle the situation.

Do not use outlines around the logo elements.

Do not change the position of the elements.

Do not place backgrounds.

Do not distort, stretch, tilt, or alter the logo in any way.

Do not rotate the logo.

Do not alter from the standard colour version.

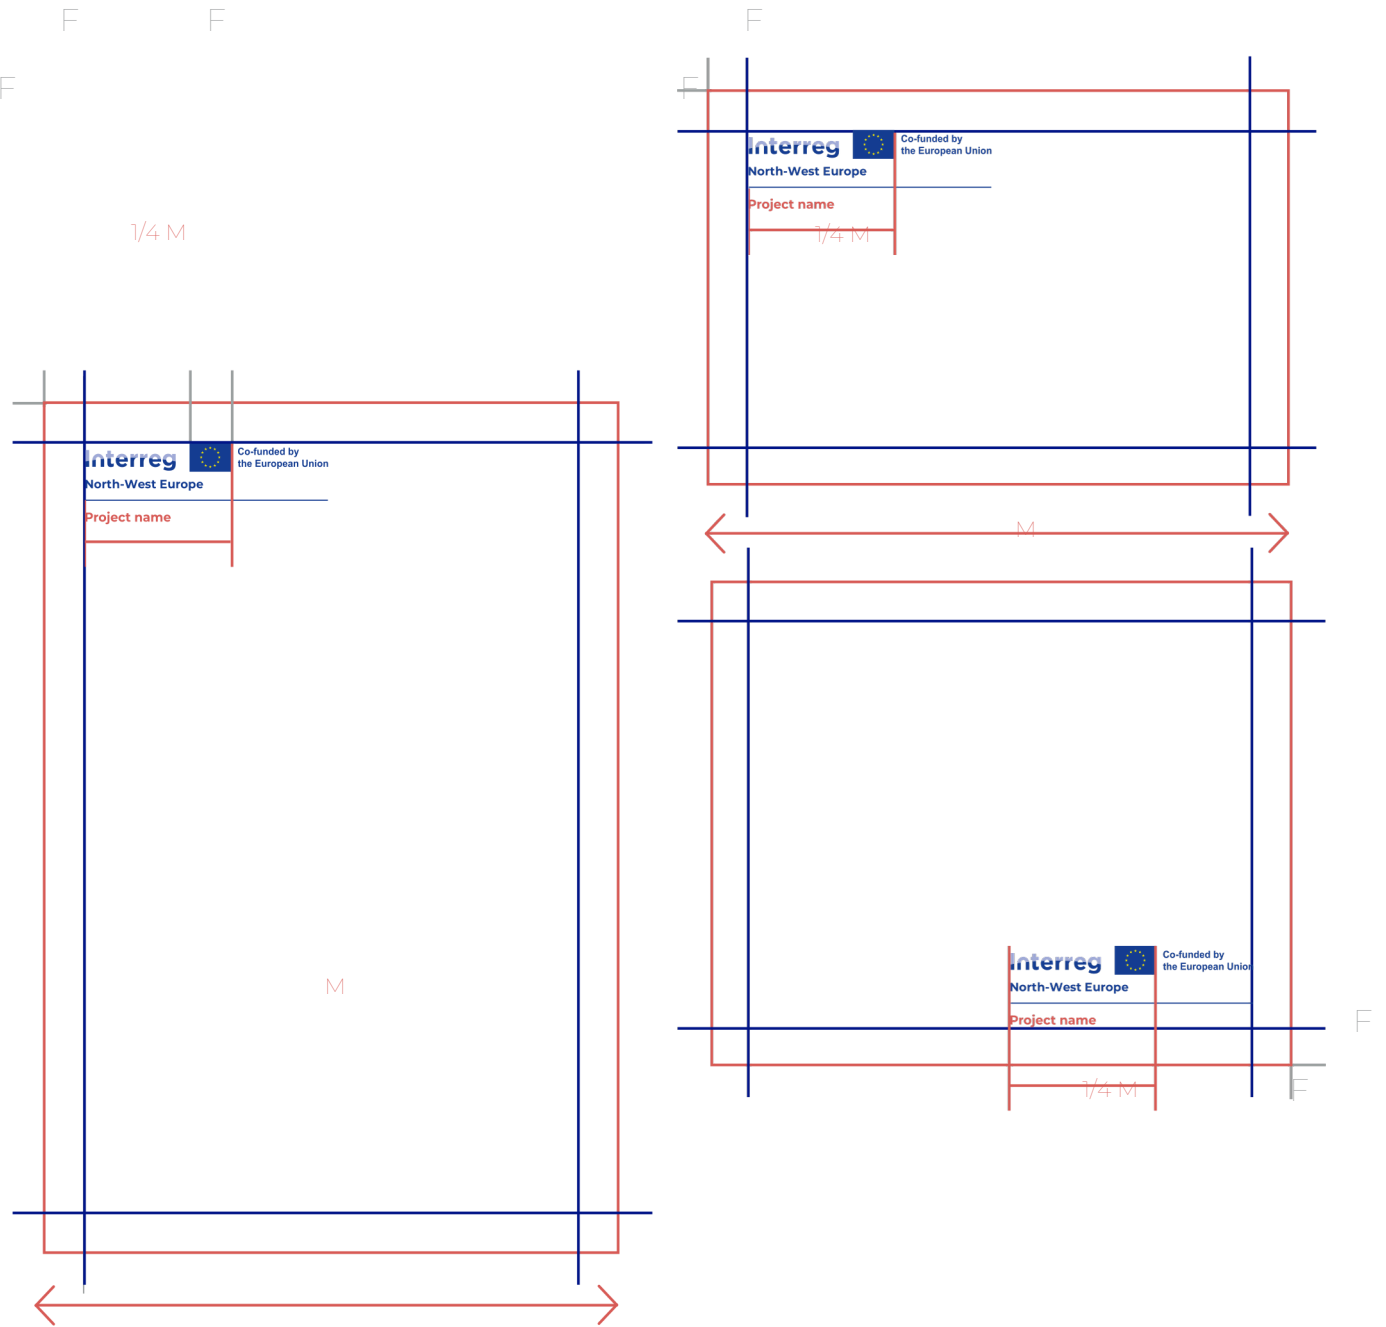

1.1 LOGO POSITIONING

Whatever the format (A3, A4, A5) and orientation (landscape or portrait), logo positioning must always respect 3 rules:

1 / The logo must always be readable and visible. The logo must not disappear in a corner of the page: the width of the logotype + EU emblem is equivalent to a fourth ($1/4M$) of the page width (M).

2 / Always leave a margin around the logo, do not stick it to an edge. The width of the EU emblem (F) is used to determine the size of all external margins.

3 / Always position the logo in a corner and directly against the margin lines.

1.2 PROJECT COLOURS

MAIN COLOUR

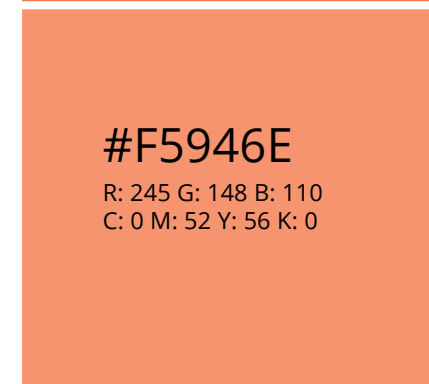

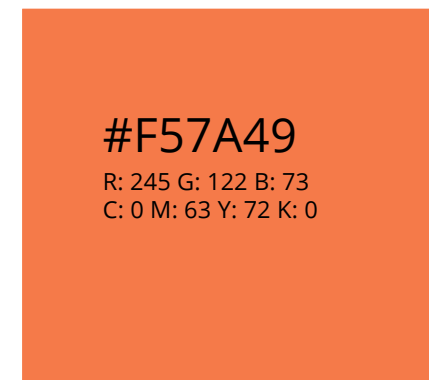

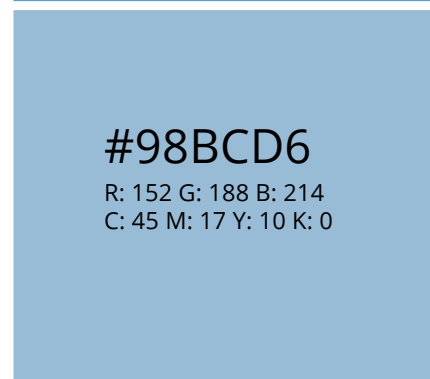

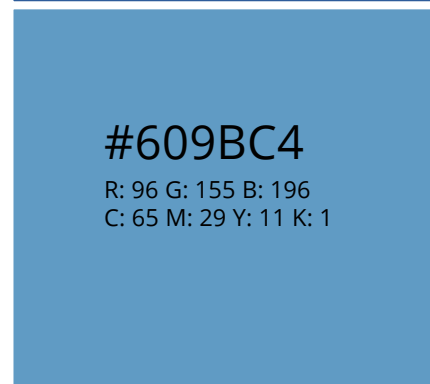

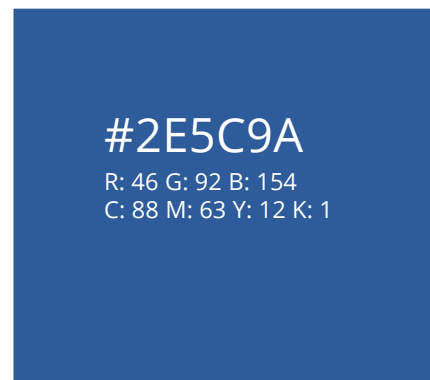

The colour scheme was developed to clearly label the thematic priorities. The colours were chosen in accordance with the Interreg Brand Design Manual 2021-2027 to support and enhance the coherence in communication of all Interreg programmes. Consequently, project names within project logos should be written in the colour of the thematic priority they address.

TYPOGRAPHY

The generic typeface for all applications, from body text to headlines, is Open Sans. As an alternative serif typeface to Open Sans, Vollkorn was chosen. It can be used alone or in combination with Open Sans. The following rules apply for all print publications and stationery applications.

COMPULSORY ELEMENTS AS PER EUROPEAN REGULATION

Common Provisions Regulation (EU) 2021/1060

PROJECT POSTER

During project implementation all project **partners are required** to put up an **A3 poster** at a location readily visible to the public (such as the entrance area of an organisation's headquarters).

PERMANENT PLAQUE

For any **infrastructure** and **work**, or equipment purchases, projects are required to put up a durable plaque or billboard visible to the public on site. The permanent plaque must be of significant size (minimum of 1x1 m) and displayed at a location readily visible to the public , as soon as the investment is applied.

COMPULSORY ELEMENTS AS PER EUROPEAN REGULATION

WEBSITE VISIBILITY

During project implementation all project **partners are required** to put up a dedicated webpage at their official website. Ideally, it should be placed under a European Project's section, however not exclusively.

This webpage should remain active throughout the project's duration.

REQUIREMENTS

1. The project name and logo;
2. A link to the forest4youth.nweurope.eu website;
3. The short description provided in the Branding Kit;
4. The project partner's list. (with links and/or logos, when possible)

EXAMPLE

Forest4Youth

An escalating youth mental health crisis is leaving adolescents vulnerable to anxiety, depression, and behavioural issues. Forest4Youth harnesses North-West Europe's woodland potential—proven to reduce stress and improve emotional well-being—to provide relief, resilience, and renewed hope. By bringing together mental health institutions, forestry experts, and leading academics, Forest4Youth offers immersive therapies (both real and VR) to meet adolescents' clinical needs and embed them into psychiatric care.

Co-funded by the European Union , through Interreg NWE's framework (*plus other contributions*) and running from 2025 to 2028. Forest4Youth aims to develop:

1. a joint synthesis of the forest-based initiatives and research experiences at the benefit of teenagers facing mental health issues;
2. a joint care protocol integrating both real and VR forest experiences;
3. the implementation of 8 pilot therapeutic forests in NWE countries and of pilot VR immersive forest-based activities;
4. the implementation of pilot actions targeting 400 teenagers facing mental health issues;
5. guidelines for public authorities, foresters and mental health professionals
6. tailor-made training framework for mental health professionals and foresters
7. the implementation of 5 reference centers to ensure sustainability of the outcomes of the project.

CHALLENGE

Paradigm of Adolescent Mental Health in North-West Europe
At a time when mental health services dedicated to teenagers are saturated, innovative therapies to support recovery are increasingly necessary. Research has shown promising results for therapies based on immersion in the forest, particularly concerning symptoms of depression and anxiety.

Taking advantage of the NWE region's 20% woodland, the project intends to exploit the potential of these natural spaces for the benefit of adolescent mental health users. These promising therapies are not yet being implemented in NWE, where about 17.5% of young people suffer from mental health problems.

OBJECTIVES

Main Objective
Enhance adolescents' access to mental health services by developing a collaborative forest-based therapy protocol designed to support the recovery of adolescents (aged 12-18) from psychiatric units across NWE. This project aims to implement innovative immersive and virtual forest-based therapeutic interventions, while promoting forest management practices that integrate health benefits, ultimately improving access to high-quality care for this vulnerable population.

EXPECTED RESULTS

- A joint synthesis of the forest-based initiatives and research experiences at the benefit of teenagers facing mental health issues.
- A joint care protocol integrating both real and VR forest experiences.

400 Adolescents directly targeted

8 Pilot therapeutic forests

150 Participations in joint training activities

THE PROJECT

The project aims to expand the utilization of forest areas as a therapeutic resource for targeted adolescents, emphasizing the accessibility and recovery-oriented aspects.

The innovation aspect lies into the strong joint collaboration between both mental health and forest sector to develop this approach.

Total project budget €5,5 million
EU funding €3,3 million

EXCEPTION WHEN LOGO USE IS NOT POSSIBLE

The official project logo must be used in all communication and dissemination materials whenever possible. **Only in cases where the use of the logo is technically or contextually impossible**, a contingency branding approach may be enacted.

In such instances, the project may be referred to by its **official name** and **project code**. It is essential that any such reference explicitly states that the project is **co-funded by the European Union** and that it originates within the **Interreg North-West Europe programme**.

ACADEMIC PUBLICATIONS

This publication has been developed within the framework of the Interreg North-West Europe 2021–2027 project “Forest4Youth” (project code NWE0400643), co-funded by the European Union.
